

x4OSCA Connector

Microsoft Dynamics 365 & OSCA digitally connect your supply chain partners.

x4OSCA integrates **Microsoft Dynamics 365 Finance & Supply Chain Management** with our cloud-based **supply chain management platform OSCA**. This enables companies to automate data exchange between ERP systems and global supply chain partners and create **end-to-end transparency**.

Key Features:

1. Seamless Integration

Standardized connection of D365 to OSCA.

2. Automated Order Export

Transfer of relevant orders from D365 to OSCA.

3. Import of Order Updates

Feedback is processed directly in D365.

4. Import of Final Shippings

Shipping information flows automatically into the ERP system.

5. Transparent Status Updates

Up-to-date delivery information available in D365.

6. Clear System Architecture

Separate systems with an integrated data foundation.

Business Benefits:

1. Central Control in D365

Order and transport processes remain in the ERP.

2. Central Integration Architecture

No separate interfaces per supplier required.

3. Reduced Manual Effort

Automated message transmission.

4. End-to-End Transparency

Continuous tracking of international supply chains.

5. Improved Planning Capability

Up-to-date data supports precise inventory control.

x4OSCA seamlessly integrates your supply chain partners into your ERP. Without additional standalone solutions or complex interface landscapes.
